

INSTALLATION OF IP CAMERA CCTV

By
Ogah Ida

Work Breakdown Structure

The management of GiG in line with the standard the practice has created this Work Breakdown Structure (WBS) to aid the effective management of the IP CCTV installation projects from start to finish. This WBS shows the logical subdivision of the project and the task dependencies. Management of the project is then done on a task-by-task basis.

| ID | Task | Dependencies |
|-----|--|--------------|
| 110 | Contract signing with GiG Motors | |
| 115 | Inception meeting & Reports | 110 |
| 120 | Procurement of devices & Peripherals | 110 |
| 130 | Identification of camera points & laying of cables | 120 |
| 210 | IP CCTV Installation | 130 |
| 310 | Testing & Approval | 210 |
| 320 | Technical Training | 310 |
| 410 | Project launch | 320 |

The visual representation showing the flow of the work breakdown structure is included on the next page.
